

market overview

In a month where global equities lost over 2%, SWM's ETF portfolios with ESG focus saw only minor declines. Our equity-containing ETF portfolios outperformed their benchmarks by between 1% and 2% in October, bringing year-to-date outperformance to between 7.6% and 12%, these are record levels. This continues our long-running trend of generating significant outperformance in every ETF strategy (details on p.2 of the fact sheets). The drivers of **November's** outperformance were threefold: 1) strong, positive performance from several of our core ESG ETFs (notably our solar power, wind energy and water ETFs); 2) our underweight position in European equities paid off, this was by far the weakest region in October 2020; 3) a very strong increase in the small cryptocurrency position that our portfolios hold. Following **October's** correction, equity markets are now looking oversold. Short-term volatility is likely following the US election tomorrow. However, our intermediate-term signals are strongly positive for equities, and we would recommend adding to equity holdings at current levels. Overall, we have a Neutral weighting in equities.

ESG portfolios using ETFs

portfolio objectives

Our fixed-income ETF portfolio is a globally-diversified portfolio made up exclusively of fixed-income ETFs (Exchange Traded Funds). It is made up mostly of government bonds and investment-grade corporate bonds.

The target net annual return is 2%-4%, with volatility below 5%. Over the last 5 years, this portfolio would have provided a net return of 2.85% per annum, with volatility of 4.04% (Sharpe ratio of 0.35). Performance prior to inception is based on back-tested performance data. The SWM fixed-income ETF portfolio is suitable for investors seeking income within a low-risk portfolio, and who wish to prioritise capital preservation.

ESG portfolios using ETFs

portfolio objectives

Our conservative portfolio is a globally diversified, multi-asset class portfolio made up exclusively of ETFs (Exchange Traded Funds). It has a high focus on capital protection, and equity exposure is limited to a maximum of 40%.

The target net annual return is 3%-5%, with the portfolio currently providing a net annualised return since inception of 5.14%. The current annualised volatility of this portfolio since inception (at 6.35%) is much lower than typical equity volatility (15%-25%). The conservative portfolio is suitable for those who desire some equity exposure whilst keeping volatility low.

ESG portfolios using ETFs

portfolio objectives

Our equity ETF portfolio is a globally-diversified portfolio made up predominantly of equity ETFs (Exchange Traded Funds). The portfolio must hold at least 80% equities at all times, the typical weighting is around 90%.

The target net annual return is 6% - 10%, with volatility of 10% -15% (in-line with typical equity volatility). Based on back-tested performance data, the SWM equity portfolio would have consistently outperformed the MSCI All-Country World Index over the last five years. The SWM equity ETF portfolio is suitable for investors targeting long term capital growth.

portfolio objectives

Our equity 100% leveraged ETF portfolio is a globally-diversified portfolio made up predominantly of equity ETFs (Exchange Traded Funds). The portfolio must hold at least 80% equities at all times, the typical weighting is around 90%.

The target net annual return is 12% - 20%, with volatility of 20% -30% (double the typical equity market volatility). Based on back-tested performance data, the SWM equity 100% portfolio would have consistently outperformed the MSCI All-Country World Index over the last five years. The SWM equity 100% leveraged ETF portfolio is suitable for investors targeting aggressive capital growth with a high risk tolerance.

disclaimer / risk warning

The performance information presented in this fact sheet includes backtested performance based on historical price data from September 30, 2010 to period ending date shown using the strategy of buying, holding and quarterly rebalancing of the SWM fixed-income ETF portfolio, SWM equity ETF portfolio holdings and SWM equity 100% leveraged ETF portfolio. The current yield is assumed to have been accrued on a daily basis. In the event that a constituent security has no historical price data, returns on the security are assumed to be zero. Backtested performance is hypothetical (it does not reflect trading in actual accounts) and is provided for informational purposes to indicate historical performance had the portfolio been available over the relevant period.
